

Downloading Resource Packs to Use from Promethean Planet

1. Login to Promethean Planet.
2. From the gray menu choose Resources, then Resource Packs.
3. The Search field appears on the left. Find the Resource Pack that you desire to add to your library and click on the Title.
4. Click on the Download resource that appears to the right on the screen.

5. From the window that appears click on Save.
6. From the window that appears browse to find a location to save the pack.
7. Before you navigate away from the Resource Pack within the Plant, note where the resources will be added to the library. The path is usually given below the description.

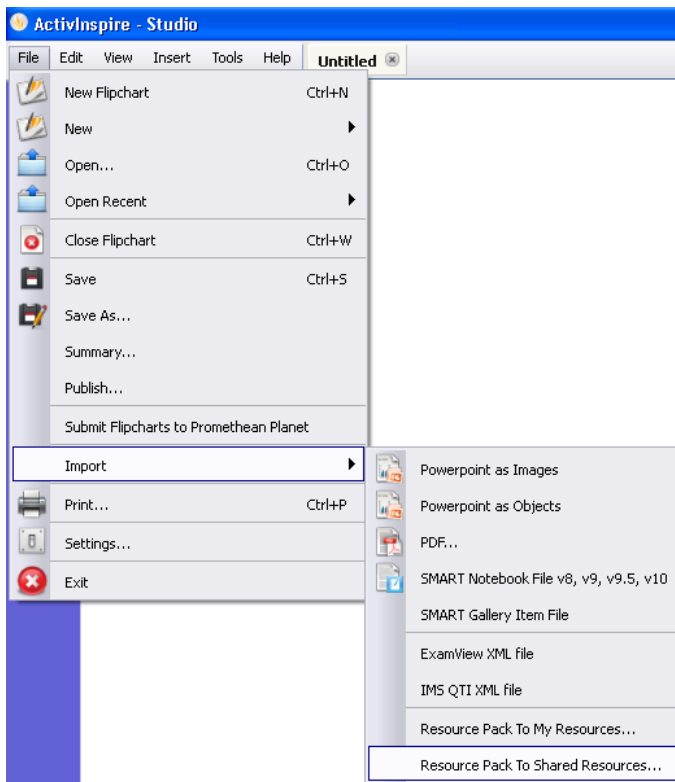

Adding the Downloaded Packs to the Resource Library

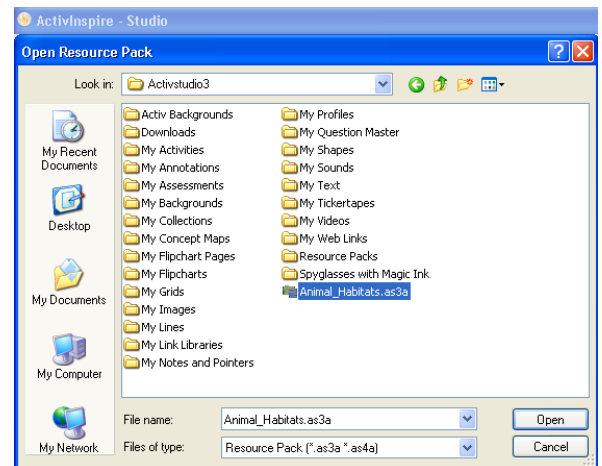

If you have just one to install, you may open it from this window, by clicking Open once the download is complete.

Otherwise...

1. Browse to the location in which you saved your resource pack(s).
2. From the File menu, click on the Import from Resource Pack button.

3. From the window that appears locate where you saved the resource pack.
4. Select the appropriate pack.
(You may only import one at a time.)
5. Click Open.

6. It will begin to re-index your Shared Resource Library. You may stop it if you are installing more than one pack or don't have the time to wait for it, but it will not let you search your library until it is indexed. The resources are usable, just not searchable.
